

GN Otometrics

Booth 1662

GN Otometrics will be demonstrating OTOflex, the new generation of smart Bluetooth wireless immittance instrumentation and OTODiagnostics Suite – a powerful data collection software package. Also at display: ASSR capability added to the CHARTR[®] EP system as well as a revolutionary audiovisual multimedia fitting system designed especially for high-end digital hearing instruments. Also, monocular and binocular VNG testing using the same pair of goggles. See our full line of integrated hearing and balance solutions under the Madsen and ICS Medical brands.
